

Installation Procedure

Survey

Date: February 24, 2014
Product: Spectra Precision SP80 GNSS Receiver
Subject: The SP80 USB Driver Installation Procedure

Introduction

This document is the installation procedure of the **SP80** USB driver.

The Spectra Precision SP80 USB serial emulation driver shall be installed by a customer before any connection of the SP80 to a PC using the USB cable.

Upgrade procedure

The installation procedure is as follows:

- Copy the appropriate installation file on your PC based on the type of Operating System of the PC
 - o **SpectraPrecisionUSBSerialSetup_x64** for 64-bit operating system PC
 - o **SpectraPrecisionUSBSerialSetup_x86** for 32-bit operating system PC
- Execute the installation file (double click) and follow instructions

Notes:

- Installer and driver are digitally signed with the Trimble certificate (Digital Signer: Trimble Navigation)
- This prevents to display the “Unknown Publisher” warning on Windows Vista, Windows 7, Windows 8
- The “Unknown Publisher” warning will still be displayed on Windows XP (as it is the case with drivers not signed by Microsoft)
